

Grandparents Caring for Grandchildren

DEFINITION

Grandparents caring for grandchildren is the percentage of family households in which a grandparent is financially responsible for food, shelter, clothing, child care, etc. for any or all grandchildren under age 18 living in the household.

SIGNIFICANCE

One in ten children in the United States lives with a grandparent. The number of children living with grandparents rose sharply at the start of the recession and has been stable since 2009. Black children are more likely to be cared for primarily by a grandparent than White, Hispanic, or Asian children.¹

Grandparents can provide continuity and family support for children in vulnerable families. Children may be in grandparent care because of parental divorce or economic challenges or they have a parent who is unemployed, incarcerated, ill, struggling with substance abuse, or coping with other problems.²

Grandparents who are financially responsible for their grandchildren have higher rates of poverty compared to other adults. Twenty-two percent of grandparent caregivers live below the poverty line, compared to 10% of the population age 50 and over.^{3,4}

Many grandparent have informal custody arrangements and are not involved with child welfare agencies, often receiving fewer services than traditional foster parents.⁵ Compared to the general population, children in informal kinship care are less likely to be covered by health insurance and are more likely to have physical and mental disabilities.⁶

Grandparents and other relative caregivers can lack information about the support services (such as training, respite, and peer support), resources, programs, and policies available to them.⁷ Nearly all children in kinship care are eligible for cash assistance through Temporary Assistance for Needy Families (TANF) regardless of their household's income level, yet children in informal custody arrangements are much less likely to receive these payments.⁸

Grandparent caregivers are at risk for poor physical and mental health. They may have difficulty enrolling children in school and/or seeking health insurance or medical care for the children. Many caregivers do not pursue the required legal process required for permanent status to avoid strain on family relationships and due to cost.^{9,10,11} Grandparents make up the largest percentage of relative caregivers, but aunts, uncles, cousins, siblings and other relative caregivers may face similar obstacles.¹²

Rhode Island Grandparents Financially Responsible for Their Grandchildren, by Length of Time Responsible, 2011-2015

Source: U.S. Census Bureau, American Community Survey, 2011-2015. Table B10050.

- ◆ Between 2011 and 2015, there were a total of 13,569 children in Rhode Island living in households headed by grandparents.¹³ During this time period, there were 6,044 grandparents who were financially responsible for their grandchildren, 63% of whom had been financially responsible for three or more years.¹⁴
- ◆ In 2010, 6% (13,968) of all children in Rhode Island lived with a grandparent caregiver and 2% (4,398) lived with other relatives.¹⁵
- ◆ Children in informal kinship care (i.e., placed with relatives without the involvement of a child welfare agency) are more likely to live in poverty than children living with their parents. Nationally, over one-third (38%) of children in public and private kinship care live in poverty. Only 42% of eligible children in kinship care receive Medicaid coverage.¹⁶
- ◆ Rhode Island regulations state that the Department of Children, Youth and Families (DCYF) must give priority to relatives when placing a child in out-of-home care.¹⁷ On December 31, 2016, there were 721 children under age 19 in DCYF care who were in out-of-home placements with a grandparent or other relative. These children made up 39% of all children in out-of-home placements in Rhode Island.¹⁸
- ◆ The federal *Fostering Connections to Success and Increasing Adoptions Act* helps children and youth in foster care establish permanent families through subsidized guardianship and adoption by family members.¹⁹ Rhode Island is one of 33 states with a Guardianship Assistance Program that provides financial assistance payments to grandparents and other relative caregivers who assume legal guardianship.²⁰

Source of Data for Table/Methodology

U.S. Census Bureau, Census 2010.

The denominator is the number of children under age 18 living in family households according to Census 2010. A family household is defined by the U.S. Census Bureau as consisting of a householder and one or more people living together in the same household who are related to the householder by birth, marriage or adoption – it may include others not related to the householder.

Core cities are Central Falls, Pawtucket, Providence, and Woonsocket.
