

Children in Poverty

DEFINITION

Children in poverty is the percentage of children under age 18 who are living in households with incomes below the poverty threshold, as defined by the U.S. Census Bureau. Poverty is determined based on income received during the year prior to the Census.

SIGNIFICANCE

Poverty is related to every KIDS COUNT indicator. Children in poverty, especially those who experience poverty in early childhood and for extended periods, are more likely to have physical and behavioral health problems, experience difficulty in school, become teen parents, and earn less or be unemployed as adults.^{1,2,3} Children in poverty are less likely to be enrolled in preschool, more likely to attend schools that lack resources and rigor, and have fewer opportunities to participate in extracurricular activities.^{4,5,6}

Nationally and in Rhode Island, children of color are more likely to grow up poor than White children. Children under age six, who have single parents, whose parents have low educational levels, or whose parents work part-time or are unemployed are at increased risk of living in poverty.^{7,8}

In 2017, the federal poverty threshold was \$20,780 for a family of three with two children and \$25,100 for a family of four with two children.⁹

The official poverty measure does not reflect the effects of key government policies and programs that support families living in poverty, does not take into account the increased cost of transportation, child care, housing, and medical care, and does not consider geographic variations in the cost of living. To address these limitations, in 2011, the U.S. Census Bureau began releasing a Supplemental Poverty Measure. This measure does not replace the official measure, but provides policy makers with a new way to evaluate the effects of anti-poverty policies.¹⁰

According to the *2016 Rhode Island Standard of Need*, a single-parent family with two children would need to earn \$52,932 a year to meet its basic needs, more than twice the federal poverty level for a family of three. Work supports such as subsidized child care, health coverage (RIte Care), food assistance, and tax credits, can help families with incomes below the federal poverty level meet their basic needs.¹¹

Children in Poverty				
	2013	2014	2015	2016
RI	21.5%	19.8%	19.4%	17.0%
US	22.2%	21.7%	20.7%	19.5%

Children in Poverty, by Race and Ethnicity, Rhode Island, 2012-2016

Source: U.S. Census Bureau, American Community Survey, 2012-2016. Tables S1701, B17020A, B17020B, B17020C, B17020D, B17020G and B17020I. *Hispanic children may be included in any race category.

- ◆ Between 2012 and 2016, 19% (40,699) of Rhode Island's 209,667 children under age 18 with known poverty status lived in households with incomes below the federal poverty threshold.¹²
- ◆ In Rhode Island as well as in the United States as a whole, Hispanic, Black, and Native American children are more likely than White and Asian children to live in families with incomes below the federal poverty threshold.¹³
- ◆ Between 2012 and 2016, over half (56%) of all children living in poverty in Rhode Island were White, 14% were Black, 2% were Asian, 2% were Native American, 18% were Some other race, and 8% were Two or more races. During the same period of time, 59% of Native American, 40% of Hispanic, and 31% of Black children in Rhode Island lived in poverty, compared to 8% of Asian children and 15% of White children.¹⁴
- ◆ Between 2012 and 2016, 48% of Rhode Island's poor children were Hispanic. Hispanic children may be included in any race category. The Census Bureau asks about race separately from ethnicity, and the majority of families who identify as Some other race also identify as Hispanic.¹⁵
- ◆ In 2016, nearly one in five (17%) children in Rhode Island (a total of 35,106 children) lived in poverty.¹⁶

Rhode Island's Poor Children, 2012-2016

By Age

- 36% ■ Ages 5 and Younger
- 33% ■ Ages 6 to 11
- 16% ■ Ages 12 to 14
- 16% ■ Ages 15 to 17

n=40,699

By Family Structure

- 23% ■ Married Couple Family
- 8% ■ Unmarried Male Householder
- 66% ■ Unmarried Female Householder
- 2% ■ Not in Related-Family Household

Child Poverty Concentrated in Four Core Cities, Rhode Island, 2012-2016

CITY/TOWN	NUMBER IN POVERTY	PERCENTAGE IN POVERTY	NUMBER IN EXTREME POVERTY	PERCENTAGE IN EXTREME POVERTY
Central Falls	2,364	41.6%	1,049	18.5%
Pawtucket	4,859	30.7%	1,996	12.6%
Providence	15,068	37.5%	6,770	16.8%
Woonsocket	3,674	41.1%	1,802	20.2%
Rhode Island	40,699	19.4%	17,908	8.5%

Source: Population Reference Bureau analysis of 2012-2016 American Community Survey data.

◆ Between 2012 and 2016, almost two-thirds (64%) of Rhode Island's children living in poverty lived in just four cities. These cities, termed core cities, are Central Falls, Pawtucket, Providence, and Woonsocket, all communities in which more than one in four children live below poverty (37% between 2012-2016). The four core cities also have substantial numbers of children living in extreme poverty, defined as families with incomes below 50% of the federal poverty level, or \$9,875 for a family of three with two children and \$12,429 for a family of four with two children in 2017.^{17,18}

Young Children Under Age Six in Poverty, Four Core Cities and Rhode Island, 2012-2016

CITY/TOWN	NUMBER <AGE 6 IN POVERTY	PERCENTAGE <AGE 6 IN POVERTY
Central Falls	1,062	44.9%
Pawtucket	1,858	32.8%
Providence	5,129	37.8%
Woonsocket	1,458	45.0%
Rhode Island	14,639	22.5%

Source: Population Reference Bureau analysis of 2012-2016 American Community Survey data.

◆ Between 2012 and 2016, 22.5% (14,639) of Rhode Island children under age six lived in poverty.¹⁹ Children under age six are at higher risk of living in poverty than any other age group.²⁰ Exposure to risk factors associated with poverty, including inadequate nutrition, environmental toxins, crowded and unstable housing, maternal depression, trauma and abuse, lower quality child care, and parental substance abuse interferes with young children's emotional, physical, and intellectual development.^{21,22}

Children in Poverty

Financial Asset Building

- ◆ Having assets such as bank or credit union accounts provides families with a safe place to store their money and allows families to conduct basic financial transactions, manage financial emergencies related to unemployment or illness, and plan for their future.^{23,24}
- ◆ Many low-income families lack knowledge about or access to traditional banks and instead rely on cash transactions or alternative financial services, such as check-cashing stores, payday lenders, rent-to-own stores, and refund anticipation loans. These families pay high fees for financial transactions and high interest rates on loans, and often struggle to build credit histories and achieve economic security.^{25,26}
- ◆ In Rhode Island in 2015, 5% of households did not have a checking or savings account, compared to 7% for the U.S. as a whole. Nationally, households with incomes less than \$15,000 and households where Spanish is the only language spoken are less likely to have a checking or savings account. These households are more likely to use alternative financial services, such as money orders, cash checking services, or payday lenders.²⁷
- ◆ Raising awareness about the importance of saving and consumer protections, providing financial education and counseling, preventing predatory lending, and connecting families to safe and affordable financial products can support families in using traditional banking institutions and increase their savings.²⁸
- ◆ State and federal policies that protect families from predatory mortgage lending and payday lending and expand access to convenient, cost-effective, and safe financial services would allow families to keep more of their earnings, save and invest more, and could ultimately promote a more stable workforce and stronger communities.^{29,30,31}
- ◆ Many public assistance programs have eligibility provisions that limit the amount of assets and/or the value of vehicles a family can own. Such policies discourage families from saving and building the assets they need to improve their economic security.³²
- ◆ Rhode Island currently has a \$1,000 asset limit to qualify for and retain RI Works cash assistance and is one of only nine states with such a restrictive asset limit. Under Rhode Island law, the value of one vehicle for each adult household member (not to exceed two vehicles per household) does not count toward the family's asset limit.^{33,34}

Building Blocks of Economic Security

Income Supports

- ◆ The Supplemental Poverty Measure shows the positive impact of government programs, such as the Earned Income Tax Credit (EITC), Social Security, SNAP, and housing subsidies. These programs keep millions of children out of poverty.³⁵

Health Coverage and Access to Care

- ◆ Low-income people are the most likely to be uninsured; some because of job loss, some are ineligible for coverage through their employers because they work part-time, and others cannot afford the cost.³⁶ Children with health insurance (public or private) are more likely to have a regular and accessible source of health care than uninsured children.³⁷

Affordable Quality Child Care

- ◆ In Rhode Island in 2015, the average cost of center-based child care for one infant was \$12,091.³⁸ Child care subsidies can help poor families afford the cost of high-quality child care, which can help parents maintain employment and support children's development.³⁹

Educational Attainment

- ◆ Fifty-four percent of Rhode Island children whose parents lack a high school diploma and 32% of children whose parents have only a high school diploma live in poverty.⁴⁰ By 2020, 71% of all jobs in Rhode Island will require postsecondary training beyond high school.⁴¹

Affordable Housing

- ◆ In 2017, the average rent for a two-bedroom apartment in Rhode Island was \$1,385.⁴² In Rhode Island, a family of three with an income at the federal poverty level would need to spend 81% of its income on rent to pay this amount, well above the recommended percentage of 30%.^{43,44} Nationally, only one in four eligible low-income families receive rental assistance to help them afford the high cost of housing.⁴⁵

Child Support

- ◆ As of December 1, 2017, there were 73,028 children in Rhode Island's Office of Child Support Services system.⁴⁶ Child support helps reduce poverty. Custodial parents who receive steady child support payments are less likely to rely on public assistance and more likely to find work faster and stay employed longer than those who do not.⁴⁷ Among poor custodial parents that received full child support in 2015 in the U.S., these payments represented 58% of their mean personal income.⁴⁸

Source of Data for Table/Methodology

Data are from the U.S. Census Bureau, Census 2000, Summary File 3, P87 and PCT.50 and Population Reference Bureau analysis of 2012-2016 American Community Survey data. The data include the poverty rate for all children for whom poverty was determined, including “related” children and “unrelated children” living in the household.

The American Community Survey is a sample survey, and therefore the number and percentage of children living in poverty provided are estimates, not actual counts. The reliability of these estimates varies by community. In general, estimates for small communities and communities with relatively low poverty rates are not as reliable as estimates for larger communities and communities with higher poverty rates.

*The Margin of Error around the percentage is greater than or equal to five percentage points.

The Margin of Error is a measure of the reliability of the estimate and is provided by the U.S. Census Bureau. The Margin of Error means that there is a 90 percent chance that the true value is no less than the estimate minus the Margin of Error and no more than the estimate plus the Margin of Error. (See the Methodology Section for Margins of Errors for all communities.)

Core cities are Central Falls, Pawtucket, Providence, and Woonsocket.
