## Children in Single-Parent Families

## DEFINITION

Children in single-parent families is the percentage of children under age 18 who live in families headed by an unmarried person of any gender regardless of whether both parents live in the home but are unmarried or if only one parent lives in the home. These numbers include "own children" defined as never-married, under age 18 , and related to the family head by birth, marriage, or adoption.

## SIGNIFICANCE

According to the U.S. Census Bureau's American Community Survey, there were 186,681 children living with one or more parents in Rhode Island between 2018 and 2022. Of these, $35 \%$ $(65,796)$ were living with an unmarried parent, the same percentage of children between 2013 and 2017. ${ }^{1,2}$

Between 2018 and 2022, 78\% of children living in poverty in Rhode Island were living in single-parent families. Children in single-parent families in Rhode Island were five times more likely to be living in poverty than those in married-couple families. Between 2018 and 2022 in Rhode Island, $29 \%$ of children in single-parent families lived in poverty, compared to $5 \%$ of children in married-couple families. ${ }^{3}$

Single-parent families led by mothers were more likely to live in poverty than single-parent families led by fathers. ${ }^{4}$ Between 2018 and 2022, the median
family income for married two-parent families $(\$ 128,469)$ was twice that of male-headed single-parent families $(\$ 60,777)$ and more than three times that of female-headed single-parent families ( $\$ 39,573$ ). ${ }^{5}$

The financial hardship, and associated stress of single parenthood can contribute to differences in the socioeconomic well-being of children in single-parent households compared to those in twoparent households. ${ }^{6}$ Increasing parents' education levels can make a significant difference in their earning power. Single mothers with associate degrees earn an average of $\$ 152,927$ more over their lifetimes than those with high school diplomas, and single mothers with bachelor's degrees earn \$296,044 more. Increasing the incomes of low-income families with young children under age six by $\$ 3,000$ per year can improve long-term outcomes for their children. ${ }^{7}$ Supports like child care assistance, paid family leave, and paid sick time are also vital supports for single parents and their children. ${ }^{8}$

| Single-Parent Families |  |  |

Families With Children Under Age 18 and Income Below the Poverty Threshold, by Race \& Ethnicity, Rhode Island, 2018-2022

Source: U.S. Census Bureau, American Community Survey, 2018-2022. Tables B17010, B17010A, B17010B, B17010D B17010F, B17010I. *Hispanic or Latino may be in any race category.
$\star$ Hispanic and Black single-parent families and single-parent families of Some other race in Rhode Island are almost one and a half times as likely as white single-parent families to live in poverty. Hispanic, Black, and married-couple families of Some other race are more likely than white and Asian married-couple families in Rhode Island to live in poverty.'

## Family Structure and Child Well-Being

$\star$ In the United States, one in four parents living with a child is unmarried (25\%). This marks a dramatic change from 50 years ago, when fewer than one in 10 parents living with their children was unmarried (7\%). At the same time, the profile of unmarried parents has shifted so that now $35 \%$ of all unmarried parents are living with a partner. ${ }^{10}$

* Children in the U.S. live in a variety of family structures. Among those who live with at least one of their biological parents, $59 \%$ live in families with only biological parent(s) and full sibling(s), and $41 \%$ live in families with single parents, stepparents, stepsiblings, and/or half siblings. ${ }^{11}$
* After increasing for several decades, the rate of births per 1,000 unmarried women in the U.S. has decreased to 38 per 1,000 in 2021 since its peak of 52 per 1,000 between 2007 and 2008. ${ }^{12,13}$ Babies born to cohabiting couples comprise $25 \%$ of all births and $\mathbf{6 0 \%}$ of nonmarital births in the U.S., and they account for nearly the entire increase in nonmarital births. ${ }^{14}$

Source of Data for Table/Methodology
U.S. Census Bureau, Census 2010. Children's Living Arrangements data from the Census 2020 will not be available until Fall 2024.
The denominator is the number of children under age 18 living in family households according to Census 2010. A family household is defined by the U.S. Census Bureau as consisting of a householder and one or more people living together in the same household who are related to the householder by birth, marriage, or adoption - it may include others not related to the householder.

Core cities are Central Falls, Pawtucket, Providence, and Woonsocket.
