# **Child Population**

## **DEFINITION**

Child population is the total number of children under age 18 and the percentage change between 2010 and 2020 in the total number of children under age 18.

## **SIGNIFICANCE**

According to the 2020 U.S. Census, there were 1,097,379 Rhode Island residents in 2020. Children under age 18 made up 19% of the population. Rhode Island's child population decreased from 247,822 in 2000 to 223,956 in 2010 and then further to 209,785 in 2020 (a 15% decrease from 2000 to 2020). In 2020, 30% (62,971) of Rhode Island children were under age six, 22% (45,198) were ages six to nine, 30% (61,948) were ages 10 to 14, and 19% (39,668) were ages 15 to 19.4

Between 2019 and 2023, there were 117,976 households with children under age 18 in Rhode Island, representing 27% of all households.<sup>5</sup> In Rhode Island, between 2019 and 2023, 123,746 (59%) children under age 18 lived in married-couple households, 64,067 (31%) children lived in single-parent households, and 16,628 (8%) children lived with relatives, including grandparents. A total of 3,405 (2%) children lived with foster families or other non-relative heads of household. There were 501 (<1%) children and youth under age 18 who lived in group

quarters and 133 (<1%) youth who were householders or spouses. 6.7.8

Rhode Island's children are diverse in race, ethnicity, language, and country of origin. Mirroring the national trend, the Hispanic child population in Rhode Island has grown since 2000, both in numbers and as a percentage of the child population. In 2020, Hispanic children made up 26% of children under age 18 in the United States and 27% of children under age 18 in Rhode Island. 9,10

Between 2019 and 2023, there were 10,559 foreign-born children under the age of 18 living in Rhode Island, representing approximately 5% of the child population. Of Rhode Island children ages five to 17, 77% speak only English at home, 18% speak Spanish, 4% speak other Indo-European languages, 1% speak Asian or Pacific Island languages, and 1% speak other languages at home.

Sexual orientation and gender identity are other important facets of diversity among youth. According to the *2023 Youth Risk Behavior Survey*, 17.5% of high school students in Rhode Island described themselves as lesbian, gay, or bisexual. In addition, 5.2% described themselves as other and 4.8% as questioning. Among high school students, 3.9% described themselves as transgender.<sup>13</sup>

n=209,785

# Decennial Census 2020

- ♦ In 2020, the U.S. Census Bureau conducted its most recent decennial Census. Although the overall population of Rhode Island (1,097,379) grew by 4.3% from 2010 to 2020, the child population (209,785) declined by 6.3% over this same period. 14,15
- ◆ Certain populations have been historically hard to count in the decennial Census, including young children under age five, immigrants, low-income populations, People of Color, people experiencing homelessness, and people in non-traditional households.¹6 The 2020 Census reveals that People of Color and young children continue to be undercounted, and Children of Color were undercounted at an even higher rate than in 2010.¹७३18
